Mathematics				
Advanced Subsidiary PAPER 1: Pure Mathematics  You must have: Mathematical Formulae and Statistical Tables (Green), calculator				
		een), calculator		

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

## Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer all questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
  - there may be more space than you need.
- You should show sufficient working to make your methods clear.
   Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

## Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 16 questions in this question paper. The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
  - use this as a guide as to how much time to spend on each question.

## **Advice**

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- Good luck with your examination.

1.	In this question you should show all stages of your working.	
	Solutions relying on calculator technology are not acceptable.	
	Using algebra, solve the inequality	
	$x^2 - x > 20$	
	writing your answer in set notation.	(3)

Question 1 continued

4.	[In this question the unit vectors $\mathbf{i}$ and $\mathbf{j}$ are due east and due north respectively.]	
	A stone slides horizontally across ice.	
	Initially the stone is at the point $A(-24\mathbf{i} - 10\mathbf{j})$ m relative to a fixed point $O$ .	
	After 4 seconds the stone is at the point $B(12\mathbf{i} + 5\mathbf{j})$ m relative to the fixed point $O$ .	
	The motion of the stone is modelled as that of a particle moving in a straight line at constant speed.	
	Using the model,	
	(a) prove that the stone passes through $O$ ,	(2)
	(b) calculate the speed of the stone.	(3)

Question 4 continued

5.

Figure 1

Figure 1 shows part of the curve with equation  $y = 3x^2 - 2$ 

The point P(2, 10) lies on the curve.

(a) Find the gradient of the tangent to the curve at P.

**(2)** 

The point Q with x coordinate 2 + h also lies on the curve.

- (b) Find the gradient of the line PQ, giving your answer in terms of h in simplest form. (3)
- (c) Explain briefly the relationship between part (b) and the answer to part (a).

(1)

10. A student is investigating the following statement about natural numbers.	
" $n^3 - n$ is a multiple of 4"	
(a) Prove, using algebra, that the statement is true for all odd numbers.	(4)
(b) Use a counterexample to show that the statement is not always true.	(1)

Question 10 continued

Question 10 continued

Question 10 continued	
	(Total for Question 10 is 5 marks)

11.	The owners of a nature reserve decided to increase the area of the reserve covered by tree	es.
	Tree planting started on 1st January 2005.	
	The area of the nature reserve covered by trees, A km <sup>2</sup> , is modelled by the equation	
	$A = 80 - 45e^{ct}$	
	where $c$ is a constant and $t$ is the number of years after 1st January 2005.	
	Using the model,	
	(a) find the area of the nature reserve that was covered by trees just before tree planting started.	
		(1)
	On 1st January 2019 an area of $60  \mathrm{km}^2$ of the nature reserve was covered by trees.	
	(b) Use this information to find a complete equation for the model, giving your value of <i>c</i> to 3 significant figures.	
		(4)
	On 1st January 2020, the owners of the nature reserve announced a long-term plan to have $100\mathrm{km}^2$ of the nature reserve covered by trees.	
	(c) State a reason why the model is not appropriate for this plan.	(1)

	Question 11 continued
(Total for Question 11 is 6 marks)	(Total for Question 11 is 6 marks)

12. In this question you should show all stages of your working.

Solutions relying entirely on calculator technology are not acceptable.

(i) Solve, for  $0 < \theta \le 450^{\circ}$ , the equation

$$5\cos^2\theta = 6\sin\theta$$

giving your answers to one decimal place.

**(5)** 

(ii) (a) A student's attempt to solve the question

"Solve, for 
$$-90^{\circ} < x < 90^{\circ}$$
, the equation  $3 \tan x - 5 \sin x = 0$ "

is set out below.

$$3\tan x - 5\sin x = 0$$

$$3\frac{\sin x}{\cos x} - 5\sin x = 0$$

$$3\sin x - 5\sin x \cos x = 0$$

$$3 - 5\cos x = 0$$

$$\cos x = \frac{3}{5}$$

$$x = 53.1^{\circ}$$

Identify two errors or omissions made by this student, giving a brief explanation of each.

**(2)** 

The first four positive solutions, in order of size, of the equation

$$\cos(5\alpha + 40^\circ) = \frac{3}{5}$$

are  $\alpha_1$ ,  $\alpha_2$ ,  $\alpha_3$  and  $\alpha_4$ 

(b) Find, to the nearest degree, the value of  $\alpha_4$

13.

Figure 2

The resting heart rate, h, of a mammal, measured in beats per minute, is modelled by the equation

$$h = pm^q$$

where p and q are constants and m is the mass of the mammal measured in kg.

Figure 2 illustrates the linear relationship between  $\log_{10} h$  and  $\log_{10} m$ 

The line meets the vertical  $\log_{10} h$  axis at 2.25 and has a gradient of -0.235

(a) Find, to 3 significant figures, the value of p and the value of q.

**(3)** 

A particular mammal has a mass of 5 kg and a resting heart rate of 119 beats per minute.

(b) Comment on the suitability of the model for this mammal.

**(3)** 

(c) With reference to the model, interpret the value of the constant p.

**(1)**

**14.** A curve C has equation y = f(x) where

$$f(x) = -3x^2 + 12x + 8$$

(a) Write f(x) in the form

$$a(x+b)^2+c$$

where a, b and c are constants to be found.

**(3)** 

The curve C has a maximum turning point at M.

(b) Find the coordinates of M.

**(2)** 

Figure 3

Figure 3 shows a sketch of the curve *C*.

The line l passes through M and is parallel to the x-axis.

The region R, shown shaded in Figure 3, is bounded by C, l and the y-axis.

(c) Using algebraic integration, find the area of R.

**(5)**

15.

Figure 4

Figure 4 shows a sketch of a circle C with centre N(7, 4)

The line *l* with equation  $y = \frac{1}{3}x$  is a tangent to *C* at the point *P*.

Find

- (a) the equation of line PN in the form y = mx + c, where m and c are constants, (2)
- (b) an equation for C.

**(4)** 

The line with equation  $y = \frac{1}{3}x + k$ , where k is a non-zero constant, is also a tangent to C.

(c) Find the value of k.

**(3)** 

Question 15 continued

Question 15 continued

Question 15 continued	
(Total fo	or Question 15 is 9 marks)

<b>16.</b> The curve C has equation $y = f(x)$ where	
$f(x) = ax^3 + 15x^2 - 39x + b$	
and $a$ and $b$ are constants.	
Given	
<ul> <li>the point (2, 10) lies on C</li> <li>the gradient of the curve at (2, 10) is -3</li> </ul>	
(a) (i) show that the value of $a$ is $-2$	
(ii) find the value of b.	
	(4)
(b) Hence show that C has no stationary points.	(3)
(c) Write $f(x)$ in the form $(x - 4)Q(x)$ where $Q(x)$ is a quadratic expression to be found.	(2)
(d) Hence deduce the coordinates of the points of intersection of the curve with equation	
y = f(0.2x)	
and the coordinate axes.	(2)
