You must have: Mathematical Formulae and Statistical Tables (Lilac), calculator			Total Marks

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 9 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Total 4 marks)

Q1

- $$(4 - 5x)^{-\frac{1}{2}} \quad |x| < \frac{4}{5}$$

(4)

$$1 + \frac{3}{10}x + mx^2 + \dots \quad \text{where } m \text{ is a constant}$$

- (2)

- (2)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Leave
blank

Question 2 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Total 8 marks)

Q2

3.

**Figure 1**

Figure 1 shows a sketch of part of the curve with equation $y = e^{0.5x} - 2$

The region R , shown shaded in Figure 1, is bounded by the curve, the x -axis and the y -axis.

The region R is rotated 360° about the x -axis to form a solid of revolution.

Show that the volume of this solid can be written in the form $a \ln 2 + b$, where a and b are constants to be found.

(6)

Q3

(Total 6 marks)

4.

**Figure 2**

Figure 2 shows a sketch of part of the curve with parametric equations

$$x = 2t^2 - 6t, \quad y = t^3 - 4t, \quad t \in \mathbb{R}$$

The curve cuts the x -axis at the origin and at the points A and B , as shown in Figure 2.

(a) Find the coordinates of A and show that B has coordinates $(20, 0)$. (3)

(b) Show that the equation of the tangent to the curve at B is

$$7y + 4x - 80 = 0 \quad (5)$$

The tangent to the curve at B cuts the curve again at the point P .

(c) Find, using algebra, the x coordinate of P . (4)

Q4

(Total 12 marks)

A Cartesian coordinate system with a horizontal x-axis and a vertical y-axis. The origin is labeled O . A curve representing the function $y = \frac{1}{x}$ for $x > 0$ is shown. The curve starts high on the y-axis and decreases as it moves to the right. A shaded region, labeled R , is bounded by the x-axis, the vertical line $x = 2$, the vertical line $x = 4$, and the curve $y = \frac{1}{x}$. The x-axis has tick marks at 2 and 4.

(a) Find $\int \frac{\ln x}{x^2} dx$ (3)

$$y = \frac{3 + 2x + \ln x}{x^2} \quad x > 0.5$$

(b) Use the answer to part (a) to find the exact area of R , writing your answer in simplest form. (4)

Leave
blank

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Total 7 marks)

Q5

$$y = x^{\sin x} \quad x > 0 \quad y > 0$$

- $$\tan x + x \ln x = 0$$

[illegible]

Leave
blank

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Q6

- $$\int_1^5 \frac{3x}{\sqrt{2x-1}} \, dx$$

(6)

- $$\int \frac{6x^2 - 16}{(x + 1)(2x - 3)} \, dx$$

(6)

Q7

(Total 12 marks)

- $$l_1: \quad \mathbf{r} = \begin{pmatrix} 4 \\ -3 \\ 2 \end{pmatrix} + \lambda \begin{pmatrix} 3 \\ -2 \\ -1 \end{pmatrix} \quad \text{where } \lambda \text{ is a scalar parameter}$$

$$l_2: \quad \mathbf{r} = \begin{pmatrix} 2 \\ 0 \\ -9 \end{pmatrix} + \mu \begin{pmatrix} 2 \\ -1 \\ -3 \end{pmatrix} \quad \text{where } \mu \text{ is a scalar parameter}$$

(a) find the position vector of X .

(5)

Given that \overrightarrow{PQ} is perpendicular to l_2

- (b) calculate the coordinates of Q .

(5)

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a guide for handwriting or typing. The background is a clean, solid white color. There are no margins, text, or other markings present on the page.

Leave
blank

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Q8

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 2 continued

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire surface, typical of standard notebook or school paper. The lines are thin and light in color, providing a guide for writing without being distracting. There are no margins, text, or other markings on the page.

Q2

(Total 6 marks)

Q3

(Total 8 marks)

(a) Find, in ascending powers of x , the first four non-zero terms of the binomial expansion of $f(x)$. Give each coefficient in simplest form.

(b) By substituting $x = \frac{1}{4}$ into the binomial expansion of $f(x)$, obtain an approximation for $\sqrt{3}$

(2)

Q4

A Cartesian coordinate system with a horizontal x-axis and a vertical y-axis. The origin is labeled O . A parabola, labeled C , is plotted in the first quadrant. The parabola opens upwards and its vertex is located in the first quadrant. The curve starts at a high y-value for small x, reaches a minimum, and then increases as x increases. The label C is placed to the left of the curve, between the y-axis and the vertex.

Figure 1 shows a sketch of the curve C with parametric equations

(a) Use parametric differentiation to find the gradient of C at $x = 3$ (4)

(b) Find $f(x)$ in the form $a(x + b)^2 + c$, where a , b and c are constants to be found. (3)

(c) Find the range of f . (2)

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Q5

In this question you must show all stages of your working.

A Cartesian coordinate system showing the graph of the function $y = \cos(x)$ for $x \in [0, \frac{\pi}{2}]$. The x-axis is labeled with 0 , $\frac{\pi}{6}$, and $\frac{\pi}{2}$. The y-axis is labeled with y . The origin is labeled O . The curve starts at $(0, 1)$, passes through $(\frac{\pi}{6}, \frac{\sqrt{3}}{2})$, and ends at $(\frac{\pi}{2}, 0)$. The area under the curve from $x = \frac{\pi}{6}$ to $x = \frac{\pi}{2}$ is shaded in gray and labeled R .

Figure 2 shows a sketch of the curve with equation

The region R , shown shaded in Figure 2, is bounded by the curve, the x -axis and the line with equation $x = \frac{\pi}{6}$

(7)

Leave
blank

Question 6 continued

[illegible]

Q6

- the line l has equation $\mathbf{r} = \begin{pmatrix} 4 \\ 2 \\ -3 \end{pmatrix} + \lambda \begin{pmatrix} -4 \\ -3 \\ 5 \end{pmatrix}$ where λ is a scalar constant
- the point A has position vector $9\mathbf{i} - 3\mathbf{j} + 2\mathbf{k}$

(a) find

- (i) the coordinates of X
- (ii) the shortest distance from A to l .

(7)

(b) Find the position vector of B .

(2)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Q7

In this question you must show all stages of your working.

(a) Find $\int x^2 \ln x dx$

$$y = x \ln x \quad x > 0$$

(b) Find the exact volume of the solid formed, giving your answer in simplest form.

Q8

9.

**Figure 4**

Figure 4 shows a cylindrical tank that contains some water.

The tank has an internal diameter of 8 m and an internal height of 4.2 m.

Water is flowing into the tank at a constant rate of $(0.6\pi)\text{ m}^3$ per minute.

There is a tap at point T at the bottom of the tank.

At time t minutes after the tap has been opened,

- the depth of the water is h metres
- the water is leaving the tank at a rate of $(0.15\pi h)\text{ m}^3$ per minute

(a) Show that

$$\frac{dh}{dt} = \frac{12 - 3h}{320} \quad (4)$$

Given that the depth of the water in the tank is 0.5 m when the tap is opened,

(b) find the time taken for the depth of water in the tank to reach 3.5 m. (6)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Q9

(Total 10 marks)

“Prove by contradiction that if n^3 is even, then n is even”

Assume that there exists a number n such that n^3 is even, but n is odd.

$$\begin{aligned}\text{So } n^3 &= (2p+1)^3 \\ &= 8p^3 + 12p^2 + 6p + 1 \\ &= \end{aligned}$$

Complete this proof by filling in line 5.

(1)

(b) Hence, prove by contradiction that $\sqrt[3]{2}$ is irrational.

(5)

(Total 6 marks)

TOTAL FOR PAPER: 75 MARKS

Question 4 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Q4

(Total 8 marks)

5.

Figure 2

Figure 2 shows a sketch of the curve with parametric equations

$$x = \sqrt{9 - 4t} \quad y = \frac{t^3}{\sqrt{9 + 4t}} \quad 0 \leq t \leq \frac{9}{4}$$

The curve touches the x -axis when $t = 0$ and meets the y -axis when $t = \frac{9}{4}$

The region R , shown shaded in Figure 2, is bounded by the curve, the x -axis and the y -axis.

(a) Show that the area of R is given by

$$K \int_0^{\frac{9}{4}} \frac{t^3}{\sqrt{81 - 16t^2}} dt$$

where K is a constant to be found.

(4)

(b) Using the substitution $u = 81 - 16t^2$, or otherwise, find the exact area of R .

(Solutions relying on calculator technology are not acceptable.)

(6)

Leave
blank

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Leave

Pearson Edexcel International Advanced Level

Time 1 hour 30 minutes

Paper reference **WMA14/01**

Mathematics

International Advanced Level

Pure Mathematics P4

You must have:
Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 9 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

Turn over ►

1. The binomial expansion of

$$(3 + kx)^{-2} \quad |kx| < 3$$

where k is a non-zero constant, may be written in the form

$$A + Bx + Cx^2 + Dx^3 + \dots$$

where A, B, C and D are constants.

(a) Find the value of A

(1)

Given that $C = 3B$

(b) show that

$$k^2 + 6k = 0$$

(3)

(c) Hence (i) find the value of k

(ii) find the value of D

(3)

Question 1 continued

(Total for Question 1 is 7 marks)

2. (a) Express $\frac{1}{(1+3x)(1-x)}$ in partial fractions. (3)

(b) Hence find the solution of the differential equation

$$(1 + 3x)(1 - x) \frac{dy}{dx} = \tan y \quad -\frac{1}{3} < x \leq \frac{1}{2}$$

for which $x = \frac{1}{2}$ when $y = \frac{\pi}{2}$

Give your answer in the form $\sin^n y = f(x)$ where n is an integer to be found.

(6)

Question 2 continued

[illegible]

Question 2 continued

[illegible]

Question 2 continued

(Total for Question 2 is 9 marks)

3.

Figure 1

A tablet is dissolving in water.

The tablet is modelled as a cylinder, shown in Figure 1.

At t seconds after the tablet is dropped into the water, the radius of the tablet is x mm and the length of the tablet is $3x$ mm.

The cross-sectional area of the tablet is decreasing at a constant rate of $0.5 \text{ mm}^2 \text{ s}^{-1}$

- (a) Find $\frac{dx}{dt}$ when $x = 7$
- (4)**

- (b) Find, according to the model, the rate of decrease of the volume of the tablet when $x = 4$

Question 3 continued

(Total for Question 3 is 8 marks)

4. In this question you must show all stages of your working.

Solutions relying on calculator technology are not acceptable.

A curve has equation

$$16x^3 - 9kx^2y + 8y^3 = 875$$

where k is a constant.

(a) Show that

$$\frac{dy}{dx} = \frac{6kxy - 16x^2}{8y^2 - 3kx^2}$$

(4)

Given that the curve has a turning point at $x = \frac{5}{2}$

(b) find the value of k

(4)

Question 4 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 4 continued

[illegible]

Question 4 continued

(Total for Question 4 is 8 marks)

5.

In this question you must show all stages of your working.

Solutions relying on calculator technology are not acceptable.

(a) Use the substitution $x = 2 \sin u$ to show that

$$\int_0^1 \frac{3x+2}{(4-x^2)^{\frac{3}{2}}} dx = \int_0^p \left(\frac{3}{2} \sec u \tan u + \frac{1}{2} \sec^2 u \right) du$$

where p is a constant to be found.

(4)

(b) Hence find the exact value of

$$\int_0^1 \frac{3x + 2}{(4 - x^2)^{\frac{3}{2}}} dx$$

(4)

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

(Total for Question 5 is 8 marks)

6. Relative to a fixed origin O ,

- the point A has position vector $\mathbf{i} - 4\mathbf{j} + 3\mathbf{k}$
- the point B has position vector $5\mathbf{i} + 3\mathbf{j} - 2\mathbf{k}$
- the point C has position vector $3\mathbf{i} + p\mathbf{j} - \mathbf{k}$

where p is a constant.

The line l passes through A and B .

(a) Find a vector equation for the line l

(3)

Given that \overrightarrow{AC} is perpendicular to l

(b) find the value of p

(3)

(c) Hence find the area of triangle ABC , giving your answer as a surd in simplest form.

(3)

Question 6 continued

[illegible]

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

(Total for Question 6 is 9 marks)

7.

In this question you must show all stages of your working.

Solutions relying entirely on calculator technology are not acceptable.

The curve C has parametric equations

$$x = \sin t - 3 \cos^2 t \qquad y = 3 \sin t + 2 \cos t \qquad 0 \leq t \leq 5$$

- (a) Show that $\frac{dy}{dx} = 3$ where $t = \pi$
- (4)**

The point P lies on C where $t = \pi$

- (b) Find the equation of the tangent to the curve at P in the form $y = mx + c$ where m and c are constants to be found.

Given that the tangent to the curve at P cuts C at the point Q

- (c) show that the value of t at point Q satisfies the equation

$$9 \cos^2 t + 2 \cos t - 7 = 0 \quad (2)$$

- (d) Hence find the exact value of the y coordinate of Q (3)

Question 7 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

[illegible]

(Total for Question 7 is 12 marks)

8. In this question you must show all stages of your working.

Solutions relying entirely on calculator technology are not acceptable.

Figure 2

Figure 3

Figure 2 shows the curve with equation

$$y = 10xe^{-\frac{1}{2}x} \quad 0 \leq x \leq 10$$

The finite region R , shown shaded in Figure 2, is bounded by the curve, the x -axis and the line with equation $x = 10$

The region R is rotated through 2π radians about the x -axis to form a solid of revolution.

(a) Show that the volume, V , of this solid is given by

$$V = k \int_0^{10} x^2 e^{-x} dx$$

where k is a constant to be found.

(2)

(b) Find $\int x^2 e^{-x} dx$

(3)

Figure 3 represents an exercise weight formed by joining two of these solids together.

The exercise weight has mass 5 kg and is 20 cm long.

Given that

$$\text{density} = \frac{\text{mass}}{\text{volume}}$$

and using your answers to part (a) and part (b),

(c) find the density of this exercise weight. Give your answer in grams per cm^3 to 3 significant figures.

(5)

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Total for Question 8 is 10 marks)

9. Use proof by contradiction to show that, when n is an integer,

$$n^2 - 2$$

is **never** divisible by 4

(4)

Question 9 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 9 continued

(Total for Question 3 is 5 marks)

4.

$$g(x) = \frac{1}{\sqrt{4-x^2}}$$

- (a) Find, in ascending powers of x , the first four non-zero terms of the binomial expansion of $g(x)$. Give each coefficient in simplest form.

(5)

- (b) State the range of values of x for which this expansion is valid.

(1)

- (c) Use the expansion from part (a) to find a fully simplified rational approximation for $\sqrt{3}$

Show your working and make your method clear.

(2)

Question 4 continued

(Total for Question 4 is 8 marks)

5. **In this question you must show all stages of your working.**
Solutions relying entirely on calculator technology are not acceptable.

Figure 2

Figure 2 shows a sketch of part of the curve with equation

$$y = \frac{12\sqrt{x}}{(2x^2 + 3)^{1.5}}$$

The region R , shown shaded in Figure 2, is bounded by the curve, the line with equation $x = \frac{1}{\sqrt{2}}$, the x -axis and the line with equation $x = k$.

This region is rotated through 360° about the x -axis to form a solid of revolution.

Given that the volume of this solid is $\frac{713}{648}\pi$, use algebraic integration to find the exact value of the constant k .

(6)

Question 5 continued

Question 5 continued

Question 5 continued

(Total for Question 5 is 6 marks)

6.

**Figure 3**

Figure 3 shows a sketch of the curve C with parametric equations

$$x = 1 + 3 \tan t \quad y = 2 \cos 2t \quad -\frac{\pi}{6} \leq t \leq \frac{\pi}{3}$$

The curve crosses the x -axis at point P , as shown in Figure 3.

- (a) Find the equation of the tangent to C at P , writing your answer in the form $y = mx + c$, where m and c are constants to be found.

(5)

The curve C has equation $y = f(x)$, where f is a function with domain $\left[k, 1 + 3\sqrt{3} \right]$

- (b) Find the exact value of the constant k .

(1)

- (c) Find the range of f .

7.

In this question you must show all stages of your working.

Solutions relying entirely on calculator technology are not acceptable.

(i) Use the substitution $u = e^x - 3$ to show that

$$\int_{\ln 5}^{\ln 7} \frac{4e^{3x}}{e^x - 3} dx = a + b \ln 2$$

where a and b are constants to be found.

(7)

(ii) Show, by integration, that

$$\int 3e^x \cos 2x \, dx = pe^x \sin 2x + qe^x \cos 2x + c$$

where p and q are constants to be found and c is an arbitrary constant.

(5)

Question 7 continued

Question 7 continued

Question 7 continued

(Total for Question 7 is 12 marks)

8. A student was asked to prove by contradiction that

“there are no positive integers x and y such that $3x^2 + 2xy - y^2 = 25$ ”

The start of the student's proof is shown in the box below.

Assume that integers x and y exist such that $3x^2 + 2xy - y^2 = 25$

$$\Rightarrow (3x - y)(x + y) = 25$$

If $(3x - y) = 1$ and $(x + y) = 25$

$$\left. \begin{array}{l} 3x - y = 1 \\ x + y = 25 \end{array} \right\} \Rightarrow 4x = 26 \Rightarrow x = 6.5, y = 18.5 \quad \text{Not integers}$$

Show the calculations and statements that are needed to complete the proof.

(4)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

(Total for Question 8 is 4 marks)

Question 9 continued

(Total for Question 9 is 5 marks)

10. A spherical ball of ice of radius 12 cm is placed in a bucket of water.

In a model of the situation,

- the ball remains spherical as it melts
- t minutes after the ball of ice is placed in the bucket, its radius is r cm
- the rate of decrease of the radius of the ball of ice is inversely proportional to the square of the radius
- the radius of the ball of ice is 6 cm after 15 minutes

Using the model and the information given,

- (a) find an equation linking r and t ,
(5)
- (b) find the time taken for the ball of ice to melt completely.
(2)
- (c) On Diagram 1 on page 27, sketch a graph of r against t .

Figure 3

In this question you must show all stages of your working.

Solutions relying entirely on calculator technology are not acceptable.

A curve C has parametric equations

$$x = \sin^2 t \quad y = 2 \tan t \quad 0 \leq t < \frac{\pi}{2}$$

The point P with parameter $t = \frac{\pi}{4}$ lies on C .

The line l is the normal to C at P , as shown in Figure 3.

(a) Show, using calculus, that an equation for l is

$$8y + 2x = 17 \quad (5)$$

The region S , shown shaded in Figure 3, is bounded by C , l and the x -axis.

(b) Find, using calculus, the exact area of S . (6)

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

(Total for Question 8 is 11 marks)

9. A student was asked to prove, for $p \in \mathbb{N}$, that

“if p^3 is a multiple of 3, then p must be a multiple of 3”

The start of the student's proof by contradiction is shown in the box below.

Assumption:

There exists a number $p, p \in \mathbb{N}$, such that p^3 is a multiple of 3, and p is NOT a multiple of 3

Let $p = 3k + 1, k \in \mathbb{N}$.

$$\begin{aligned}\text{Consider } p^3 &= (3k+1)^3 = 27k^3 + 27k^2 + 9k + 1 \\ &= 3(9k^3 + 9k^2 + 3k) + 1 \quad \text{which is not a multiple of 3}\end{aligned}$$

- (a) Show the calculations and statements that are required to complete the proof.

(3)

- (b) Hence prove, by contradiction, that $\sqrt[3]{3}$ is an irrational number.

(5)

Pearson Edexcel International Advanced Level

Friday 9 June 2023

Afternoon (Time: 1 hour 30 minutes)

Paper reference **WMA14/01**

Mathematics

International Advanced Level

Pure Mathematics P4

You must have:
Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 8 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

Turn over ►

Question 1 continued

[illegible]

Question 1 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 1 continued

(Total for Question 1 is 9 marks)

Question 2 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 2 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 2 continued

(Total for Question 2 is 10 marks)

3.

$$f(x) = \frac{8x - 5}{(2x - 1)(4x - 3)} \quad x > 1$$

(a) Express $f(x)$ in partial fractions.

(3)

(b) Hence find $\int f(x) \, dx$

(3)

(c) Use the answer to part (b) to find the value of k for which

$$\int_k^{3k} f(x) \, dx = \frac{1}{2} \ln 20$$

(5)

Question 3 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

(Total for Question 3 is 11 marks)

4. Relative to a fixed origin O ,
 - the point A has position vector $4\mathbf{i} + 8\mathbf{j} + \mathbf{k}$
 - the point B has position vector $5\mathbf{i} + 6\mathbf{j} + 3\mathbf{k}$
 - the point P has position vector $2\mathbf{i} - 2\mathbf{j} + \mathbf{k}$

The straight line l passes through A and B .

- (a) Find a vector equation for l . (2)

The point C lies on l so that PC is perpendicular to l .

- (b) Find the coordinates of C . (4)

The point P' is the reflection of P in the line l .

- (c) Find the coordinates of P'
- (2)**

- (d) Hence find $|\overrightarrow{PP'}|$, giving your answer as a simplified surd. (2)

[illegible]

Question 4 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 4 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 4 continued

(Total for Question 4 is 10 marks)

5. (i) Find

$$\int x^2 e^x dx$$

(4)

(ii) Use the substitution $u = \sqrt{1 - 3x}$ to show that

$$\int \frac{27x}{\sqrt{1-3x}} dx = -2(1-3x)^{\frac{1}{2}}(Ax+B) + k$$

where A and B are integers to be found and k is an arbitrary constant.

(6)

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

[illegible]

Question 5 continued

(Total for Question 5 is 10 marks)

6. In this question you must show all stages of your working.

Solutions relying entirely on calculator technology are not acceptable.

The temperature, $\theta^{\circ}\text{C}$, of a car engine, t minutes after the engine is turned off, is modelled by the differential equation

$$\frac{d\theta}{dt} = -k(\theta - 15)^2$$

where k is a constant.

Given that the temperature of the car engine

- is 85°C at the instant the engine is turned off
- is 40°C exactly 10 minutes after the engine is turned off

(a) solve the differential equation to show that, according to the model

$$\theta = \frac{at + b}{ct + d}$$

where a, b, c and d are integers to be found.

(7)

(b) Hence find, according to the model, the time taken for the temperature of the car engine to reach 20°C . Give your answer to the nearest minute.

(2)

Question 6 continued

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

(Total for Question 6 is 9 marks)

7. Use proof by contradiction to prove that $\sqrt{7}$ is irrational.

(You may assume that if k is an integer and k^2 is a multiple of 7 then k is a multiple of 7) (4)

Question 7 continued

(Total for Question 7 is 4 marks)

8.

**Figure 2**

Figure 2 shows a sketch of part of the curve C with parametric equations

$$x = t + \frac{1}{t} \quad y = t - \frac{1}{t} \quad t > 0.7$$

The curve C intersects the x -axis at the point Q .

(a) Find the x coordinate of Q .

(1)

The line l is the normal to C at the point P as shown in Figure 2.

Given that $t = 2$ at P

(b) write down the coordinates of P

(1)

(c) Using calculus, show that an equation of l is

$$3x + 5y = 15$$

(3)

The region, R , shown shaded in Figure 2 is bounded by the curve C , the line l and the x -axis.

(d) Using algebraic integration, find the exact volume of the solid of revolution formed when the region R is rotated through 2π radians about the x -axis.

(7)

Question 8 continued

[illegible]

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

Turn over ►

1. (a) Find the first four terms, in ascending powers of x , of the binomial expansion of

$$\frac{8}{(2-5x)^2}$$

writing each term in simplest form.

(4)

- (b) Find the range of values of x for which this expansion is valid.

(1)

Question 1 continued

(Total for Question 1 is 5 marks)

Question 2 continued

(Total for Question 2 is 7 marks)

3.

In this question you must show all stages of your working.

Solutions based on calculator technology are not acceptable.

(i) Use integration by parts to find the exact value of

$$\int_0^4 x^2 e^{2x} \, dx$$

giving your answer in simplest form.

(5)

(ii) Use integration by substitution to show that

$$\int_3^{21} \frac{4x}{(2x-1)^2} dx = a + \ln b$$

where a and b are constants to be found.

(7)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

Question 3 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

(Total for Question 3 is 12 marks)

4. (a) Prove by contradiction that for all positive numbers k

$$k + \frac{9}{k} \geq 6$$

(4)

(b) Show that the result in part (a) is not true for all real numbers.

(1)

Question 4 continued

(Total for Question 4 is 5 marks)

5.

Figure 2

Figure 2 shows a sketch of the curve C with equation

$$y^3 - x^2 + 4x^2y = k$$

where k is a positive constant greater than 1

- (a) Find $\frac{dy}{dx}$ in terms of x and y .

The point P lies on C .

Given that the normal to C at P has equation $y = x$, as shown in Figure 2,

- (b) find the value of k . (5)

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

(Total for Question 6 is 10 marks)

7. The number of goats on an island is being monitored.

When monitoring began there were 3000 goats on the island.

In a simple model, the number of goats, x , in thousands, is modelled by the equation

$$x = \frac{k(9t + 5)}{4t + 3}$$

where k is a constant and t is the number of years after monitoring began.

- (a) Show that $k = 1.8$ (2)
- (b) Hence calculate the long-term population of goats predicted by this model. (1)

In a **second** model, the number of goats, x , in thousands, is modelled by the differential equation

$$3 \frac{dx}{dt} = x(9 - 2x)$$

- (c) Write $\frac{3}{x(9-2x)}$ in partial fraction form. (3)
- (d) Solve the differential equation with the initial condition to show that

$$x = \frac{9}{2 + e^{-3t}} \quad (5)$$

- (e) Find the long-term population of goats predicted by this **second** model. (1)

Question 7 continued

Question 7 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

(Total for Question 7 is 12 marks)

8.

Figure 3

Figure 3 shows a sketch of the curve C with parametric equations

$$x = 6t - 3\sin 2t \quad y = 2\cos t \quad 0 \leq t \leq \frac{\pi}{2}$$

The curve meets the y -axis at 2 and the x -axis at k , where k is a constant.

(a) State the value of k .

(1)

(b) Use parametric differentiation to show that

$$\frac{dy}{dx} = \lambda \operatorname{cosec} t$$

where λ is a constant to be found.

(4)

The point P with parameter $t = \frac{\pi}{4}$ lies on C .

The tangent to C at the point P cuts the y -axis at the point N .

(c) Find the exact y coordinate of N , giving your answer in simplest form.

(3)

The region bounded by the curve, the x -axis and the y -axis is rotated through 2π radians about the x -axis to form a solid of revolution.

(d) (i) Show that the volume of this solid is given by

$$\int_0^\alpha \beta(1 - \cos 4t) dt$$

where α and β are constants to be found.

(ii) Hence, using algebraic integration, find the exact volume of this solid.

(6)

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 2 continued

(Total for Question 2 is 10 marks)

3.

Figure 1

The curve C , shown in Figure 1, has equation

$$y^2x + 3y = 4x^2 + k \quad y > 0$$

where k is a constant.

- (a) Find $\frac{dy}{dx}$ in terms of x and y

(5)

The point $P(p, 2)$, where p is a constant, lies on C .

Given that P is the minimum turning point on C ,

- (b) find

(i) the value of p

(ii) the value of k

(4)

Question 3 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

(Total for Question 3 is 9 marks)

4.

Figure 2

A cone, shown in Figure 2, has

- fixed height 5 cm
- base radius r cm
- slant height l cm

(a) Find an expression for l in terms of r

(1)

Given that the base radius is increasing at a constant rate of 3 cm per minute,

(b) find the rate at which the total surface area of the cone is changing when the radius of the cone is 1.5 cm. Give your answer in cm^2 per minute to one decimal place.

[The total surface area, S , of a cone is given by the formula $S = \pi r^2 + \pi rl$]

(4)

Question 4 continued

(Total for Question 4 is 5 marks)

5. (a) Find $\int x^2 \cos 2x \, dx$

(4)

(b) Hence solve the differential equation

$$\frac{dy}{dt} = \left(\frac{t \cos t}{y} \right)^2$$

giving your answer in the form $y^n = f(t)$ where n is an integer.

(5)

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

(Total for Question 5 is 9 marks)

6. Relative to a fixed origin O , the lines l_1 and l_2 are given by the equations

$$l_1 : \mathbf{r} = (3\mathbf{i} + p\mathbf{j} + 7\mathbf{k}) + \lambda(2\mathbf{i} - 5\mathbf{j} + 4\mathbf{k})$$

$$l_2 : \mathbf{r} = (8\mathbf{i} - 2\mathbf{j} + 5\mathbf{k}) + \mu(4\mathbf{i} + \mathbf{j} + 2\mathbf{k})$$

where λ and μ are scalar parameters and p is a constant.

Given that l_1 and l_2 intersect,

- (a) find the value of p ,

- (b) find the position vector of the point of intersection. (2)

- (c) Find the acute angle between l_1 and l_2
- Give your answer in degrees to one decimal place.
- (3)**

The point A lies on l_1 with parameter $\lambda = 2$

The point B lies on l_2 with \overrightarrow{AB} perpendicular to l_2

- (d) Find the coordinates of B (5)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

(Total for Question 6 is 14 marks)

7. (a) Using the substitution $u = 4x + 2 \sin 2x$, or otherwise, show that

$$\int_0^{\frac{\pi}{2}} e^{4x+2\sin 2x} \cos^2 x \, dx = \frac{1}{8}(e^{2\pi} - 1)$$

(5)

Figure 3

The curve shown in Figure 3, has equation

$$y = 6e^{2x + \sin 2x} \cos x$$

The region R , shown shaded in Figure 3, is bounded by the positive x -axis, the positive y -axis and the curve.

The region R is rotated through 2π radians about the x -axis to form a solid.

(b) Use the answer to part (a) to find the volume of the solid formed, giving the answer in simplest form.

(3)

Question 7 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

[illegible]

Question 7 continued

(Total for Question 7 is 8 marks)

8. Use proof by contradiction to prove that the curve with equation

$$y = 2x + x^3 + \cos x$$

has no stationary points.

(4)

Question 8 continued

(Total for Question 8 is 4 marks)

9.

Figure 4

Figure 4 shows a sketch of the curve C with parametric equations

$$x = \sec t \quad y = \sqrt{3} \tan\left(t + \frac{\pi}{3}\right) \quad \frac{\pi}{6} < t < \frac{\pi}{2}$$

(a) Find $\frac{dy}{dx}$ in terms of t (3)

(b) Find an equation for the tangent to C at the point where $t = \frac{\pi}{3}$

Give your answer in the form $y = mx + c$, where m and c are constants.

(4)

(c) Show that all points on C satisfy the equation

$$y = \frac{Ax^2 + B\sqrt{3x^2 - 3}}{4 - 3x^2}$$

where A and B are constants to be found.

(5)

Question 9 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

1. In this question you must show all stages of your working. Solutions relying entirely on calculator technology are not acceptable.

Find

$$\int_0^{\frac{\pi}{6}} x \cos 3x \, dx$$

giving your answer in simplest form.

(5)

Question 1 continued

(Total for Question 1 is 5 marks)

Question 2 continued

(Total for Question 2 is 6 marks)

3. The curve C is defined by the equation

$$8x^3 - 3y^2 + 2xy = 9$$

Find an equation of the normal to C at the point $(2, 5)$, giving your answer in the form $ax + by + c = 0$, where a , b and c are integers.

(7)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

(Total for Question 3 is 7 marks)

Question 4 continued

(Total for Question 4 is 6 marks)

5.

**Figure 2**

Figure 2 shows a sketch of the curve defined by the parametric equations

$$x = t^2 + 2t \quad y = \frac{2}{t(3-t)} \quad a \leq t \leq b$$

where a and b are constants.

The ends of the curve lie on the line with equation $y = 1$

(a) Find the value of a and the value of b

(2)

The region R , shown shaded in Figure 2, is bounded by the curve and the line with equation $y = 1$

(b) Show that the area of region R is given by

$$M - k \int_a^b \frac{t+1}{t(3-t)} dt$$

where M and k are constants to be found.

(5)

(c) (i) Write $\frac{t+1}{t(3-t)}$ in partial fractions.

(ii) Use algebraic integration to find the exact area of R , giving your answer in simplest form.

(6)

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 5 continued

(Total for Question 5 is 13 marks)

6. With respect to a fixed origin O , the line l_1 is given by the equation

$$\mathbf{r} = \mathbf{i} + 2\mathbf{j} + 5\mathbf{k} + \lambda(8\mathbf{i} - \mathbf{j} + 4\mathbf{k})$$

where λ is a scalar parameter.

The point A lies on l_1

Given that $|\vec{OA}| = 5\sqrt{10}$

(a) show that at A the parameter λ satisfies

$$81\lambda^2 + 52\lambda - 220 = 0 \quad (3)$$

Hence

(b) (i) show that one possible position vector for A is $-15\mathbf{i} + 4\mathbf{j} - 3\mathbf{k}$

(ii) find the other possible position vector for A .

(3)

The line l_2 is parallel to l_1 and passes through O .

Given that

- $\vec{OA} = -15\mathbf{i} + 4\mathbf{j} - 3\mathbf{k}$
- point B lies on l_2 where $|\vec{OB}| = 4\sqrt{10}$

(c) find the area of triangle OAB , giving your answer to one decimal place. (4)

Question 6 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 6 continued

[illegible]

Question 6 continued

(Total for Question 6 is 10 marks)

7. The current, x amps, at time t seconds after a switch is closed in a particular electric circuit is modelled by the equation

$$\frac{dx}{dt} = k - 3x$$

where k is a constant.

Initially there is zero current in the circuit.

- (a) Solve the differential equation to find an equation, in terms of k , for the current in the circuit at time t seconds.

Give your answer in the form $x = f(t)$.

(6)

Given that in the long term the current in the circuit approaches 7 amps,

- (b) find the value of k .

(2)

- (c) Hence find the time in seconds it takes for the current to reach 5 amps, giving your answer to 2 significant figures.

(3)

Question 7 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

[illegible]

Question 7 continued

(Total for Question 7 is 11 marks)

8. $f(x) = (8 - 3x)^{\frac{4}{3}}$ $0 < x < \frac{8}{3}$

- (a) Show that the binomial expansion of $f(x)$ in ascending powers of x up to and including the term in x^3 is

$$A - 8x + \frac{x^2}{2} + Bx^3 + \dots$$

where A and B are constants to be found.

(4)

- (b) Use proof by contradiction to prove that the curve with equation

$$y = 8 + 8x - \frac{15}{2}x^2$$

does **not** intersect the curve with equation

$$y = A - 8x + \frac{x^2}{2} + Bx^3 \qquad 0 < x < \frac{8}{3}$$

where A and B are the constants found in part (a).

(Solutions relying on calculator technology are not acceptable.)

(4)

Question 8 continued

[illegible]

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

(Total for Question 8 is 8 marks)

9.

Figure 3

The curve C , shown in Figure 3, has equation

$$y = \frac{x^{-\frac{1}{4}}}{\sqrt{1+x} (\arctan \sqrt{x})}$$

The region R , shown shaded in Figure 3, is bounded by C , the line with equation $x = 3$, the x -axis and the line with equation $x = \frac{1}{3}$

The region R is rotated through 360° about the x -axis to form a solid.

Using the substitution $\tan u = \sqrt{x}$

(a) show that the volume V of the solid formed is given by

$$k \int_a^b \frac{1}{u^2} du$$

where k , a and b are constants to be found.

(6)

(b) Hence, using algebraic integration, find the value of V in simplest form.

(3)

Question 9 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 9 continued

Pearson Edexcel International Advanced Level

Monday 28 October 2024

Morning (Time: 1 hour 30 minutes) **Paper reference WMA14/01**

Mathematics

International Advanced Level

Pure Mathematics P4

You must have:
Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 10 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

Turn over ►

1. (a) Find the first 4 terms of the binomial expansion, in ascending powers of x , of

$$(8 - 3x)^{-\frac{1}{3}} \quad |x| < \frac{8}{3}$$

giving each coefficient as a simplified fraction.

(4)

- (b) Use the answer from part (a) with $x = \frac{2}{3}$ to find a rational approximation to $\sqrt[3]{6}$

(2)

Question 1 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Total for Question 1 is 6 marks)

2.

In this question you must show all stages of your working. Solutions relying on calculator technology are not acceptable.

The curve C_1 has equation

$$y = x^4 + 10x^2 + 8 \quad x \in \mathbb{R}$$

The curve C_2 has equation

$$y = 2x^2 - 7 \quad x \in \mathbb{R}$$

Use algebra to prove by contradiction that C_1 and C_2 do **not** intersect.

(4)

Question 2 continued

(Total for Question 2 is 4 marks)

3.

Figure 1

Figure 1 shows a sketch of the curve C with parametric equations

$$x = 3 \sin^3 \theta \quad y = 1 + \cos 2\theta \quad -\frac{\pi}{2} \leq \theta \leq \frac{\pi}{2}$$

(a) Show that

$$\frac{dy}{dx} = k \operatorname{cosec} \theta \quad \theta \neq 0$$

where k is a constant to be found.

(3)

The point P lies on C where $\theta = \frac{\pi}{6}$

(b) Find the equation of the tangent to C at P , giving your answer in the form $ax + by + c = 0$ where a , b and c are integers.

(3)

(c) Show that C has Cartesian equation

$$8x^2 = 9(2 - y)^3 \quad -q \leq x \leq q$$

where q is a constant to be found.

(3)

Question 3 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 3 continued

[illegible]

Question 3 continued

(Total for Question 3 is 9 marks)

Question 4 continued

This image shows a single page of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 4 continued

[illegible]

Question 4 continued

(Total for Question 4 is 9 marks)

Question 5 continued

(Total for Question 5 is 6 marks)

6. Use the substitution $u = \sqrt{x^3 + 1}$ to show that

$$\int \frac{9x^5}{\sqrt{x^3+1}} dx = 2(x^3+1)^k (x^3-A) + c$$

where k and A are constants to be found and c is an arbitrary constant.

(5)

Question 6 continued

(Total for Question 6 is 5 marks)

7.

**Figure 4**

Figure 4 shows a sketch of part of the curve with equation

$$y = \frac{3x-1}{x+2} \quad x > -2$$

(a) Show that

$$\frac{3x-1}{x+2} \equiv A + \frac{B}{x+2}$$

where A and B are constants to be found.

(2)

The finite region R , shown shaded in Figure 4, is bounded by the curve, the line with equation $x = 4$, the x -axis and the line with equation $x = 1$

This region is rotated through 2π radians about the x -axis to form a solid of revolution.

(b) Use the answer to part (a) and algebraic integration to find the exact volume of the solid generated, giving your answer in the form

$$\pi(p + q \ln 2)$$

where p and q are rational constants.

(6)

Question 7 continued

This image shows a single page of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

(Total for Question 7 is 8 marks)

8. Relative to a fixed origin O

- the point A has coordinates $(-10, 5, -4)$
- the point B has coordinates $(-6, 4, -1)$

The straight line l_1 passes through A and B .

- (a) Find a vector equation for l_1 (2)

The line l_2 has equation

$$\mathbf{r} = \begin{pmatrix} 3 \\ p \\ q \end{pmatrix} + \mu \begin{pmatrix} 3 \\ -4 \\ 1 \end{pmatrix}$$

where p and q are constants and μ is a scalar parameter.

Given that l_1 and l_2 intersect at B ,

- (b) find the value of p and the value of q . (3)

The acute angle between l_1 and l_2 is θ

- (c) Find the exact value of $\cos \theta$ (3)

Given that the point C lies on l_2 such that AC is perpendicular to l_2

- (d) find the exact length of AC , giving your answer as a surd. (2)

Question 8 continued

Question 8 continued

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 8 continued

(Total for Question 8 is 10 marks)

$$\frac{dh}{dt} = \frac{1}{50} h(2h - 1) \cos\left(\frac{t}{10}\right)$$
$$h = \frac{5}{10 - 8e^{k \sin\left(\frac{t}{10}\right)}}$$

(Solutions relying entirely on calculator technology are not acceptable.)

Question 9 continued

This image shows a single page of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 9 continued
