1. Prove by induction that, for all $n \in \mathbb{Z}^+$,

[6]

$$\sum_{r=1}^n \ln \left(\frac{r+1}{r} \right) = \ln(n+1).$$

2.

$$\mathbf{M} = \begin{pmatrix} 2 & 3 \\ 3 & -6 \end{pmatrix}$$

(a) Find the eigenvalues of \mathbf{M} .

[4]

(b) Find eigenvectors corresponding to each eigenvalue found in part (a).

[4]

Total: 8

$$w = \frac{z + 2\mathbf{i}}{z - \mathbf{i}}, \quad z \neq \mathbf{i},$$

(a) Show that the circle $|z| = 1$ is mapped onto a straight line in the w -plane under T and find an equation of the line. [5]

(b) Find the values of a, b and r . [6]

Total: 11

- (a) Use the first three terms of the Taylor series expansion in ascending powers of $(x - x_0)$ to show that

5]

$$\frac{d^2y}{dx^2} + (x+2)\frac{dy}{dx} - 3y = 0$$

(b) Use the approximations

[6]

Total: 11

5.

$$\mathbf{A} = \begin{pmatrix} 1 & -1 & 3 \\ 4 & q & 1 \\ 1 & 2 & -1 \end{pmatrix}, \quad q \neq 4\frac{1}{4}.$$

(a) Find \mathbf{A}^{-1} in terms of q .

[7]

(b) Hence, or otherwise, solve the simultaneous equations

[4]

$$x - y + 3z = 1$$

$$4x + y + z = 2$$

$$x + 2y - z = 5$$

showing your working clearly.

Total: 11

6. Given that

$$y = \sqrt{1 - x^2} \arccos(x),$$

(a) show that

[5]

$$(1 - x^2) \frac{dy}{dx} + xy - x^2 + 1 = 0.$$

(★)

(b) By differentiating equation ★ twice, or otherwise, obtain the Maclaurin expansion of $y = \sqrt{1 - x^2} \arccos(x)$ up to and including the term in x^3 .

[8]

Total: 13

7. The plane Π_1 has vector equation

$$\mathbf{r} = 3\mathbf{i} + \mathbf{j} - 4\mathbf{k} + \lambda(\mathbf{j} + 2\mathbf{k}) + \mu(\mathbf{i} + \mathbf{j} + \mathbf{k}).$$

- (a) Find a vector n which is normal to Π_1 . [3]
- (b) Hence find a vector equation of Π_1 in the form $\mathbf{r} \cdot \mathbf{n} = p$. [2]
- (c) Find the perpendicular distance between Π_1 and the point A with position vector $2\mathbf{i} + \mathbf{j} + 4\mathbf{k}$, giving your answer in the form $a\sqrt{6}$, where $a \in \mathbb{Q}$. [4]

The plane Π_2 has equation $\mathbf{r} \cdot (\mathbf{i} + b\mathbf{j}) = -4$. The angle between Π_1 and Π_2 is 30° .

- (d) Find the possible values of the constant b . [6]
